UDF IV Q4 2014 Maturities (Update)

20 loans matured in Q4-14

- Moayed: 10 (\$89mm)
- Related: 5 (\$18mm)
- Buffington: 5 (\$17mm)

Q4 scheduled maturities represented \$123mm or ~20% of outstanding loans.

All loans related to Moayed were extended into 2015; all but 1 to related parties were extended into 2015.

Conversely, none of the loans issued to Buffington were extended.

99% of the loans that matured were not repaid and remain outstanding.

A Look at Q1 2015 Maturities – A Similarly Conflicted Story

12 loans matured in Q1-15

- Moayed: 7 (\$54mm)
- Related: 4 (\$32mm)
- Buffington: 1 (\$16mm)

Q1-15 scheduled maturities represented \$102mm or ~16% of outstanding loans.

All loans related to Moayed were extended into 2015; all related party loans were also extended into 2015.

Conversely, the one loan issued to Buffington that matured was not extended.

100% of the loans that matured were not repaid and remain outstanding.

Combined with Q4, 36% of all loans have matured in the last 2 quarters yet only 1 loan representing <1% appears to have been repaid upon maturity.

Full collectability is considered probable for all 6 loans that have matured as of March 31, 2015.

As of March 31, 2015, we had 6 matured loans with an unpaid principal balance of approximately \$32.6 million that are considered impaired because they remain outstanding beyond the contractual terms of the loan agreements. Full collectability is considered probable for all 6 loans and we have not recorded a specific allowance related to any of these impaired loans. The average monthly outstanding balance associated with impaired loans for the three months ended March 31, 2015 was approximately \$32.8 million. For the three months ended March 31, 2015, we recognized approximately \$867,000 in interest income associated with impaired loans and we did not recognize any cash basis interest income. As of December 31, 2014, we had 5 matured loans with an unpaid principal balance of approximately \$16.4 million that are considered impaired because they remain outstanding beyond the contractual terms of the loan agreements. Full collectability is considered probable for all 5 loans and we have not recorded a specific allowance related to any of these impaired loans. The average monthly outstanding balance associated with impaired loans for the year ended December 31, 2014 was approximately \$1.6 million. For the year ended December 31, 2014, we recognized approximately \$25,000 in interest income associated with impaired loans and we did not recognize any cash basis interest income.

All 6 of the matured / impaired loans are related to Buffington; Buffington-related notes represent \$67mm of the total \$627mm of loans, including the \$32.6mm that have matured and are considered impaired

Concentration of Credit Risk Unchanged

UDF IV's top 3 borrowers (Moayed, Buffington, other UDF related parties) still represent 87% of total outstanding loans, with UDF-related party loans increasing the most from year end 2014 to March 31, 2015.

UDF IV Loans Issued to Moayed Behaving Similarly (Q1 Update)

The three loan examples on this page show how UDF loans with Moayed entities behave over time: accrue larger and larger balances, have no cash receipts and are extended when the maturity date comes due

These loans had a combined balance of \$36mm at 12/31/12; as of 3/31/15, these loans had a combined balance of \$61mm, representing ~10% of UDF IV's total loans and have never generated any cash receipts based on UDF IV disclosures.

All Loans Are Still Fully Collectable

UDF IV accrues a provision for loan losses of ~0.5% annually; however, the Company individually reviews all loans and has classified all of its 132 loans as level 1 which means full collectability is considered probable as opposed to level 2, where full collectability is considered more likely than not, but not probable.

UDF III – ‘Matured’ Loans Also Increasing

UDF III does not disclose details on a loan by loan basis for all loans like UDF IV does; however it does disclose a similar schedule regarding maturities. One incremental loan matured in Q1 2015 and remains outstanding. This loan has a balance of \$88.2 million (represents ~22% of total loans); we believe this loan is related to Buffington (which has 6 loans that have matured in UDF IV but also remain outstanding).

As of March 31, 2015, we had originated or purchased 62 loans, including 40 loans that have been repaid in full by the respective borrowers and 1 loan for which the remaining balance was written-off. For the three months ended March 31, 2015, we did not originate or purchase any loans, sell any loan participations, or acquire any additional participation interests. Of the 21 loans outstanding as of March 31, 2015, the scheduled maturity dates are as follows as of March 31, 2015:

Maturity Date	Related			Non-Related			Total

As of December 31, 2014, we had originated or purchased 62 loans, including 40 loans that have been repaid in full by the respective borrowers and 1 loan for which the remaining balance was written-off. For the year ended December 31, 2014, we originated or purchased 1 loan and did not acquire any additional participation interests. Of the 21 loans outstanding as of December 31, 2014, the scheduled maturity dates are as follows as of December 31, 2014:

Maturity Date	Related			Non-Related			Total

UDF III – A Closer Look at the Q1 Matured Loan

A breakdown of the matured loans specifically shows that 1 loan with a balance of \$88.2 million matured in the first quarter of 2015; full collectability “is considered probable” for this loan as well as for 3 other loans that account for \$30.5 million (\$118.7 million in total loans that have matured and remain outstanding but for which, full collectability is considered probable).

The following table represents the maturity dates of loans that were matured as of March 31, 2015 and had not been repaid or extended as of March 31, 2015:

Maturity Date	Related			Non-Related			Total		
	Amount	Loans	% of Total	Amount	Loans	% of Total	Amount	Loans	% of Total
2009	\$ -	-	-	\$ 17,339,000	5	14%	\$ 17,339,000	5	14%
2010	-	-	-	20,840,000	1	16%	20,840,000	1	16%
2015	-	-	-	88,183,000	1	70%	88,183,000	1	70%
Total	\$ -	-	-	\$ 126,362,000	7	100%	\$ 126,362,000	7	100%

Of these 7 loans, as of March 31, 2015, full collectability is considered probable for 4 loans with an aggregate unpaid principal balance of approximately \$118.7 million, full collectability is considered more likely than not, but not probable, for 2 loans with an aggregate unpaid principal balance of approximately \$2.4 million, and 1 note receivable with an aggregate unpaid principal balance of approximately \$5.3 million was deemed as probable that we will be unable to collect all amounts due. In addition to the 7 loans considered impaired due to the loans remaining outstanding beyond the contractual terms of the loan agreement, we had one loan with an aggregate unpaid principal balance of approximately \$11 million that was considered impaired due to the estimated value of the underlying collateral and as such, full collectability on this loan is considered more likely than not, but not probable, as of March 31, 2015.

UDF III – A Closer Look at the Q1 Matured Loan (continued)

We believe that the one UDF III loan which matured in Q1 2015 is related to Buffington Land. This view is based on 1) that Buffington-related entities have \$32.6 million of matured loans that are still outstanding due to UDF IV, 2) UDF III disclosures that the matured loan is to a 'non-related party' (see previous page) and 3) UDF III disclosures regarding its concentration of credit risk (see below), namely that ~22% of the outstanding balance of its portfolio is Buffington-related (~\$88mm).

One thing is for sure: if this loan is NOT related to Buffington, then it has to be related to Mehrdad Moayed. Based on the disclosure below, affiliated entities account for 22% of the portfolio which implies 78% is 'unaffiliated' or 'non-related party'. Buffington accounts for 22% and CTMGT (Mehrdad Moayed) accounts for 45% which only leaves ~11% (78% less 22% less 45% = ~11%). Given that this one loan accounts for 22% and is to a non-related party, it could only be related to either Buffington or Moayed.

As of March 31, 2015, three entities and their affiliates were included in our notes receivables (including related party transactions) and participation interest – related party that accounted for over 10% of the outstanding balance of our portfolio. These entities include (i) CTMGT LLC, an unaffiliated Texas limited liability company, which comprises approximately 32% of the outstanding balance of our portfolio, and certain of its affiliated entities, which comprise an additional 13% of the outstanding balance, (ii) Buffington Land, Ltd., an unaffiliated Texas limited partnership, which comprises approximately 22% of the outstanding balance of our portfolio, including additional loans to its affiliated entities; and (iii) UDF I, an affiliated Delaware limited partnership, which comprises approximately 18% of the outstanding balance of our portfolio, and additional loans to its affiliated entities, which comprise an additional 4% of the outstanding balance. Our general partner is the asset manager for UDF I.

UDF III – A Closer Look at the Q1 Matured Loan (continued)

Despite such a significant loan maturing and remaining unpaid and outstanding, UDF III has not written-off any portion of this loan, likely because “full collectability is considered probable”. In accordance with GAAP, the restructuring of a loan is considered a “troubled debt restructuring” if both (i) the borrower is experiencing financial difficulties and (ii) the creditor has granted a concession. Concessions may include interest rate reductions or below market interest rates, principal forgiveness, restructuring amortization schedules and other actions intended to minimize potential losses. As of March 31, 2015 and December 31, 2014, we have no loan modifications that are classified as troubled debt restructurings.

Neither UDF III or UDF IV Accrued Any Loan Losses in Q1

Despite both having loans mature and not be repaid in the quarter, neither UDF III or UDF IV even took a standard quarterly charge/expense for “provision for loan losses”, effectively implying that the reserve account for loan losses is adequately (and perfectly) reserved.

UMT – What Are “Deficiency Notes – Related Party”?

“The Company has made loans in the normal course of business to [...] related parties, the proceeds [...] have been used to originate underlying loans”

“If the borrower or Company [UMT] foreclosed on property securing an underlying loan [...] and the proceeds from the sale were insufficient to pay the loan, the originating company had the option of (1) repaying the outstanding balance [...] or (2) delivering to the Company an unsecured deficiency note”

5. Deficiency Notes – Related Party and Non Related Party

The Company has made loans in the normal course of business to related parties and non-related parties, the proceeds from which have been used to originate underlying loans that are pledged to the Company as security for such obligations. When principal and interest on an underlying loan is due in full, at maturity or otherwise, the corresponding obligation owed by the originating company to the Company is also due in full. If the borrower or the Company foreclosed on property securing an underlying loan, or if the Company foreclosed on property securing a purchased loan, and the proceeds from the sale were insufficient to pay the loan in full, the originating company had the option of (1) repaying the outstanding balance owed to the Company associated with the underlying loan or purchased loan, as the case may be, or (2) delivering to the Company an unsecured deficiency note in the amount of the deficiency.

As of March 31, 2015, the Company had two deficiency notes with non-related parties totaling approximately \$3,236,000. One note in the amount of approximately \$1,703,000 bears interest at a rate of 14% per annum. The second note in the amount of approximately \$1,533,000 had a reserve of approximately \$801,000. The Company does not accrue interest on this note as the underlying collateral value approximates the note balance, net of reserves.

As of December 31, 2014, the Company had two deficiency notes with non-related parties totaling of approximately \$3,258,000. One note in the amount of approximately \$1,725,000 bears interest at a rate of 14% per annum. The second note in the amount of approximately \$1,533,000 had a reserve of approximately \$591,000. The Company does not accrue interest on this note as the underlying collateral value approximates the note balance, net of reserves.

As of December 31, 2007, UMTI Lending Company, L.P. (“UMTHLC”) issued to the Company a variable amount promissory note in the amount of \$5,100,000 to evidence its deficiency obligations to the Company. The initial principal amount of the note was approximately \$1,848,000. The principal balance as of December 31, 2014 was approximately \$28,740,000. Effective January 1, 2015, UMT entered into a loan modification agreement (“Agreement”) with UMTI in which the UMTHLC indebtedness is evidenced by two notes – Note 1 which bears interest at the rate of 1.75% and Note 2 which bears interest at the rate of 2.70%. Both notes mature on December 31, 2017. Under the terms of the modification agreement the following amounts were rolled into the modified UMTHLC Deficiency Note: (1) accrued interest of approximately \$3,333,000, (2) the principal balance and related accrued interest of the UMTHLC Promissory Note of approximately \$11,376,000. As of March 31, 2015, the total outstanding principal balance of the modified UMTHLC Deficiency Notes was approximately \$42,945,000. From December 31, 2007 through March 31, 2015 the Company has received approximately \$9,814,000 in aggregate principal and interest payments under the UMTHLC Promissory Note. Please see Note 4 above for additional information regarding the Agreement.

So UMT lent to affiliated entities that lent to third-parties; when the loans to third-parties went bad, the affiliated entities could not repay the UMT loans and instead provided UMT with deficiency notes...the ‘I OWE YOU’

UMT – Who Owes the Deficiency Notes?

100% of the related party deficiency note is related to one entity, UMTH Lending Company, L.P. (UMTHLC)

The balance has grown from \$5.1 million as of December 2007 to \$42.9 million as of March 2015.

In aggregate, over the 7 plus years, only \$9.8 million has been repaid in interest in principal.

The Company has made loans in the normal course of business to related parties and non-related parties, the proceeds from which have been used to originate underlying loans that are pledged to the Company as security for such obligations. When principal and interest on an underlying loan is due in full, at maturity or otherwise, the corresponding obligation owed by the originating company to the Company is also due in full. Both notes mature on December 31, 2017. Under the terms of the modification agreement the following amounts were rolled into the modified UMTHLC Deficiency Note: (1) accrued interest of approximately \$3,333,000, (2) the principal balance and related accrued interest of the UMTHLC Promissory Note of approximately \$11,376,000. As of March 31, 2015, the total outstanding principal balance of the modified UMTHLC Deficiency Notes was approximately \$42,945,000. From December 31, 2007 through March 31, 2015 the Company has received approximately \$9,834,000 in aggregate principal and interest payments under the UMTHLC Promissory Note. Please see Note 4 above for additional information regarding the Agreement.

So UMT lent to UMTHLC that lent to third-parties; UMTHLC has not been able to repay its deficiency note over the past 7+ years and the deficiency has grown significantly over time.

UMT – Who Owns UMTH Lending Company?

UMTH Lending Company (UMTHLC) is the counterparty to the related party deficiency note; UMTHLC is 99.9% owned by UMT Holdings (UMTH).

UMTH is owned by 10 limited partners.

Who are the 10 limited partners? Hollis Greenlaw et al.

United Mortgage Trust Related Party Relationships			
Company	Affiliation	Governance	Ownership
UMT Holdings, L.P. ("UMTH")	99.9% owner of our borrower, UMTHLC and our advisor, UMTHGS	UMT Services, Inc. serves as General Partner	10 Limited Partners

So UMT lent to UMTHLC which is owned by UMTH which is owned by the same people that externally manage UMT and UDF entities; UMTH and related individuals owe a significant amount of debt to UMT in deficiency notes.

(2) UMT Services serves as the general partner and owns 0.1% of the limited partnership interests in UMT Holdings, L.P. ("UMT Holdings"). The remaining 99.9% of the limited partnership interests in UMT Holdings are held as follows as of December 31, 2014: Mr. Etter (30.00%), Mr. Greenlaw (30.00%), Craig A. Pettit (5.00%), Timothy J. Kopacka (4.84%), Michael K. Wilson (7.41%), Christine A. Griffin (1.95%), Cara D. Obert (4.82%), William E. Lowe (1.06%), Ben L. Wissink (10.09%) and Melissa H. Youngblood (4.83%).

UMT – It Is Not Less Confusing in a Diagram Format

This diagram shows UMT's lending relationships with affiliated entities

UMT almost exclusively lends to entities owned by individuals that control UMT's external manager, UMTH General Services, Inc.

In addition, UDF III has equity interests in related entities that have received loans from UMT.

Source: United Mortgage Trust 10K (12.31.14)

How UMT Summarizes Its Evolution Over Time

UMT's asset mix transitioned from almost 100% 1st lien secured interim loans to an even split of "land development loans" and "cash and other assets".

"Land development loans" is really one loan to UDF I, an affiliated entity.

"Cash and other assets" is really 'recourse obligations' and 'deficiency notes' due from related parties (~75% of these assets).

"Our portfolio concentrations have shifted over the years, as we have sought adequate supplies of suitable loans in a changing real estate finance market." - UMT 10Q

Source: United Mortgage Trust 10Q (3.31.15)

One theory of what explains the 'strategic' shift:

UMT originated 1st lien interim mortgages that performed poorly and could not be repaid; as the loans went bad, the related parties who issued loans to 3rd parties assumed the liabilities through recourse obligations and deficiency notes or a related UMT entity assumed/acquired the obligation and corresponding assets through a new development loan from UMT

Waxahachie Land Sale

A 226 Acre Parcel of Land Was Sold in Waxahachie

In December 2014, Mehrdad Moayedi sold 226 acres of land in Waxahachie, TX, about 25 miles south of Dallas, TX.

The land was owned through an entity called 287 Waxahachie, LP and was sold to an entity called Morrisville Investments, LLC; the land sold was only a portion of 589 acres owned by 287 Waxahachie, LP prior to the sale.

In addition to 287 Waxahachie LP acreage, Mehrdad Moayedi owns finished lots adjacent to the undeveloped acreage through an entity called CTMGT Saddlebrook Estates FL-1, LLC

There are outstanding loans from UDF IV to both 287 Waxahachie, LP and CTMGT Saddlebrook Estates FL-1, LLC.

Following the sale, UDF IV also now has a loan outstanding to Morrisville Investments, LLC.

- Saddlebrook Estates was a development that began in 2008.
- There are ~120 homes occupied after ~7 years of 'development', 8 of which are currently listed as 'For Sale' on Zillow.
- There are currently 65 finished lots on the ground; at a current pace of ~5 starts per quarter (20/year).
- There is ~3 years of finished lot inventory that needs to be absorbed (to a significant extent) before there would be a need for incremental horizontal development of currently undeveloped acreage.
- This is for a master community that was planned for 4,000 home sites, over half a decade ago.

The Disclosure Summarized & Implied Economics

UDF IV does not specifically disclose that \$4.4 million was assigned from 287 Waxahachie to Morrisville Investments but it does disclose that \$8.7 million of loans were assigned in total in the quarter; given that 287 Waxahachie's loan declined by \$5.7 million and that there were only \$1.3 million of cash receipts, it is clear that the difference (\$4.4 million) went somewhere and specifically to a new loan issued to Morrisville Investments.

(\$ in millions, except per acre metrics)	Cash			
	Balance	Receipts	Security	Collateral

Debt / Acre	\$ 19,584			
Total Implied Purchase Price / Acre	\$ 25,328			

Assuming the reduction in the loan of \$5.7 million as the implied 'sale' price, Morrisville Investments acquired raw land for \$25,000 per acre, including debt per acre of ~\$19,600 @ 13% interest.

Comparable land on the outskirts of Waxahachie is worth ~\$6,000-\$10,000 per acre

What Search Results Look Like for 'Actual' Developers

Similar searches for Mehrdad Moayed and Tom Buffington return information that suggest each is in the business of developing land and/or building homes whereas a search for 'Albert Coppola' returns no indication that this person is in a similar type of business. This begs the questions of 1) is Albert Coppola Jr really a land developer or homebuilder, 2) if not, why did he receive a \$4.4 million loan to buy land in Waxahachie, TX from UDF.

A Summary of the Fact Patterns

- 226 acres of land in Waxahachie was sold by Mehrdad Moayedí to Albert Coppola Jr.
- The transaction price appears to be significantly above market (~4x a recent comparable transaction)
- UDF provided the financing for both the seller and buyer; it appears the loan was assigned from seller to buyer and that UDF would have had to reasonably re-underwrite the deal.
- Mehrdad Moayedí still owns 65 finished lots, plus 363 acres adjacent to the finished lots.
- At the least, the land still owned by Moayedí will be a competing developed; at worst and more likely, the land still owned by Moayedí will need to be developed before the land owned by Albert Coppola Jr will be developed.
- The 65 finished lots represent ~3 years of supply based on current starts/absorption; the 363 undeveloped acres still owned by Moayedí represents over 10 years of paper lot inventory.
- Which means...the land owned by Coppola will almost certainly not be developed in the next 5 years and more likely, will not be developed in the next 10 years, if ever.
- A Google search for Coppola returns nothing that suggests he is a developer or home builder; typically, if someone is one or the other, there is information on the internet about it.
- The address listed for Morrisville Investments LLC is a single family home, not an office building.

Even the Finished Lots Appear to be Under Water

- In the last quarter, 6 lots were sold at Saddlebrook Estates at an implied average selling price of \$22.4k (decrease in loan/lot).
- Assuming the average lot value in the last quarter (Q1-15) and the remaining # of finished lots as collateral of 65, the total remaining value of the collateral is \$1.5 million vs. the current balance of the loan of \$1.9 million. This math implies the loan, assuming no incremental interest, is impaired by ~22%.
- This also means there is likely ZERO equity in this deal for Mehrdad Moayed.
- Also note that Megatel Homes has bought a majority of the lots that have been sold and UDF IV also provides Megatel with financing.

Investments in Land Development Loans

“We may invest in loans to purchase unimproved real property. As of December 31, 2014, we have invested 0% of our assets in such loans. Unimproved real property is generally defined as real property [that...] (b) has no development or construction in process [...] and (c) no development or construction on such land is planned in good faith to commence within one year.”

Investments in land development loans present additional risks compared to loans secured by operating properties.

We may invest in loans to purchase unimproved real property. As of December 31, 2014, we have invested 0% of our assets in such loans. Unimproved real property is generally defined as real property which has the following three characteristics: (a) an equity interest in real property which was not acquired for the purpose of producing rental or other income; (b) has no development or construction in process on such land; and (c) no development or construction on such land is planned in good faith to commence within one year. Land development mortgage loans may be riskier than loans secured by improved properties, because:

- until disposition, the property does not generate separate income for the borrower to make loan payments;
- the completion of planned development may require additional development financing by the borrower, which may not be available;
- depending on the velocity or amount of lot sales to homebuilders, demand for lots may decrease, causing the price of the lots to decrease;
- depending on the velocity or amount of lot sales to developers or homebuilders, demand for land may decrease, causing the price of the land to decrease;
- there is no assurance that we will be able to sell unimproved land promptly if we are forced to foreclose upon it; and
- lot sale contracts are generally not “specific performance” contracts, and the borrower may have no recourse if a homebuilder elects not to purchase lots.

Breakdown of UDF III Claim in Perry Bankruptcy

UDF III had an unsecured claim of ~\$5.6 million in the bankruptcy of Will C. Perry; it was determined that UDF III did not have a lien on real property while UDF did have such a lien; we believe this is why UDF III had a claim in the personal bankruptcy of Will C. Perry and UDF did not. In the absence of a lien and claim on real property, UDF III likely had to rely on a personal guarantee that turned out to be worth very little.

Original Principal Advanced - Hidden Lakes	\$	1,481,250
RBC Advance - Hidden Lakes	\$	1,720,320
Total Principal Advanced	\$	3,201,570
Interest - Hidden Lakes	\$	202,711
Total Claim - Hidden Lakes	\$	3,404,281
Total Principal Advanced - Southern Colony	\$	1,894,920
Interest Due - Southern Colony	\$	256,637
Total Claim - Southern Colony	\$	2,151,558
Total - Hidden Lakes / Southern Colony		\$ 5,555,838.77

"First and foremost, UDF is described as the intended and actual lienholder on the Hidden Lakes Property in almost every document pertaining to the loan between Hidden Lakes and UDF, whereas UDF III is never mentioned in connection with the lien except for the entry on item 811 of the Settlement Statement for Purchase of the Hidden Lakes Property"

"For example, the Loan Commitment Letter from UDF to Hidden Lakes [Exhibit No. 20] sets forth that such a lien will be created in favor of UDF ("The Loan will be secured by (i) a deed of trust creating a lien against the Property, second in priority only to a senior lender providing financing for the acquisition of the Property... ") whereas the Loan Commitment Letter from UDF III to Hidden Lakes [Exhibit No. 21] for the loan between Hidden Lakes and UDF III does not."

Recovery for Class 5 Claims

“The Holders of Allowed Class 5 Claims shall be paid, pro rata, a total of \$1,002,529.76”

Class 5 allowed claims totaled \$16.1 million and had a recovery of \$1.0 million, representing a recovery of ~6.2%

Assuming a pro rata recovery of 6.2%, UDF III’s claim of \$5.6 million would have recovered ~\$345k, or a realized loss of ~\$5.2 million.

UDF III Accounting Shows No Individual Loan Loss Until 2014

Despite apparently having a crystallized loss of \$5.2 million, UDF III did not take a charge for any loans “individually evaluated for impairment” until 2014. A charge for a similar amount (\$5.3 million) was taken in 2014; however, the company only reclassified an accrued balance from its allowance for loan losses “collectively evaluated for impairment” to “individually evaluated for impairment” which basically means that it did not take an incremental charge for whatever loan was “individually evaluated”.

	For the year ended December 31,	
	2014	2013
Allowance for loan losses:

RE Loans – SEC Litigation Release

U.S. SECURITIES AND EXCHANGE COMMISSION

Litigation Release No. 23059 / August 4, 2014

Securities and Exchange Commission v. Walter Ng, Kelly Ng, Bruce Horwitz, and The Mortgage Fund, LLC, Civil Action No. C-13-08895 (N.D. Cal. filed Feb. 28, 2013)

San Francisco Bay Area Real Estate Fund Managers Settle Fraud Claims

The Securities and Exchange Commission today announced that Kelly Ng and Walter Ng, their affiliated investment advisory firm The Mortgage Fund, LLC, and Bruce Horwitz agreed to resolve fraud charges against them, which fully resolves the Commission's litigation. In the settlement, Kelly Ng, Horwitz, and The Mortgage Fund, LLC will pay a total of \$5,205,367 and Kelly Ng and Walter Ng will be barred from the securities industry. The SEC filed a complaint against the Ngs, Horwitz and the firm in federal court in Oakland, California in 2013, alleging that they defrauded investors in their real estate fund called Mortgage Fund '08 LLC (MF08) by secretly using its assets to rescue an older, rapidly collapsing fund called R.E. Loans, LLC.

According to the SEC's complaint, the Ngs and Horwitz promoted MF08 in the midst of the 2008 financial crisis as a new opportunity to invest in conservatively underwritten commercial real estate loans secured by deeds of trust. But the Ngs and their advisory firm, The Mortgage Fund LLC, immediately began transferring money raised by MF08 to R.E. Loans so that they could afford distributions to investors in that fund. From December 2007 to March 2008, the Ngs transferred almost \$39 million from MF08 to R.E. Loans. They later attempted to justify the transfers by claiming MF08 had purchased three loans from R.E. Loans that totaled around \$39 million.

The SEC further alleged that both the Ngs and Horwitz lured investors into MF08 by making false claims about its performance and the R.E. Loans fund's performance. What investors did not know was that both R.E. Loans and MF08 began to experience significant and dramatic borrower defaults in 2008. Despite the funds' rapidly disintegrating portfolios, the Ngs and Horwitz repeatedly assured investors that R.E. Loans and MF08 were performing well and the underlying loans were safe and secure.

Walter Ng, Kelly Ng, Horwitz, and The Mortgage Fund, LLC, without admitting or denying the SEC's allegations, all consented to the entry of final judgments, which the court entered on August 1, 2014. Under the terms of the settlements, Kelly Ng and the Ngs' firm will pay a total of \$4,480,025 in disgorgement, prejudgment interest, and civil monetary penalties and Horwitz will pay \$725,342. The Commission intends to ask the Court to authorize the transfer of any disgorgement, interest, and penalty payments collected to the MF08 Liquidating Trustee for distribution to MF08 investors. All four agreed to be permanently enjoined from violations of Section 17(a) of the Securities Act of 1933, Section 10(b) of the Securities Exchange Act of 1934, and Rule 10b-5 thereunder. Kelly Ng, Walter Ng, and The Mortgage Fund further agreed to be permanently enjoined from violating Sections 206(1) and (2) of the Investment Advisers Act of 1940.

Walter Ng and Kelly Ng further agreed to be barred from the securities industry, including association with any brokerage firm or investment adviser. Kelly Ng currently is incarcerated and serving an 18 month sentence after he pled guilty to twenty counts of structuring cash transactions to avoid bank reporting requirements.
